MEDICAL STORE DATA REVIEW

What the medical store data is telling us

From visibility to action: demand, stock, suppliers, and customers.

Made with GAMMA

THE OPERATING SHIFT

Next operational win: better visibility, not more complexity

Connect the signals

Use sales, inventory, supplier, payment, and employee data.

Make faster decisions

Turn routine queries into faster decisions.

Focus the effort

Protect high-demand stock; manage vendor concentration; use revenue signals more actively.

Made with GAMMA

DEMAND SIGNAL

Demand is concentrated in a small set of fast-moving medicines

A simple ranking can turn sales history into a clear stocking decision.

Made with GAMMA

Low-stock items already point to the first reorder list

01 **At or below 50 units**

These items need attention before availability becomes a customer problem.

02 **Immediate candidates**

Insulin, Eye Drops, Nasal Spray, and Protein Powder.

03 **Replenish carefully**

Pair stock quantity with expiry date so replenishment does not create avoidable waste.

Made with GAMMA

SUPPLIER CONCENTRATION

Supplier dependence is visible before it becomes a risk

$10,500

Supplier ID 30 leads total purchase value.

1. See the concentration

Track the top three suppliers by purchase value.

2. Understand leverage

Use the comparison to guide supplier conversations.

3. Review it routinely

Make supplier review a recurring management decision, not a one-time query.

Made with GAMMA

CUSTOMER ECONOMICS

$364.67

The typical order is worth about this much.

Average order value provides a baseline for promotions, bundles, and upselling.

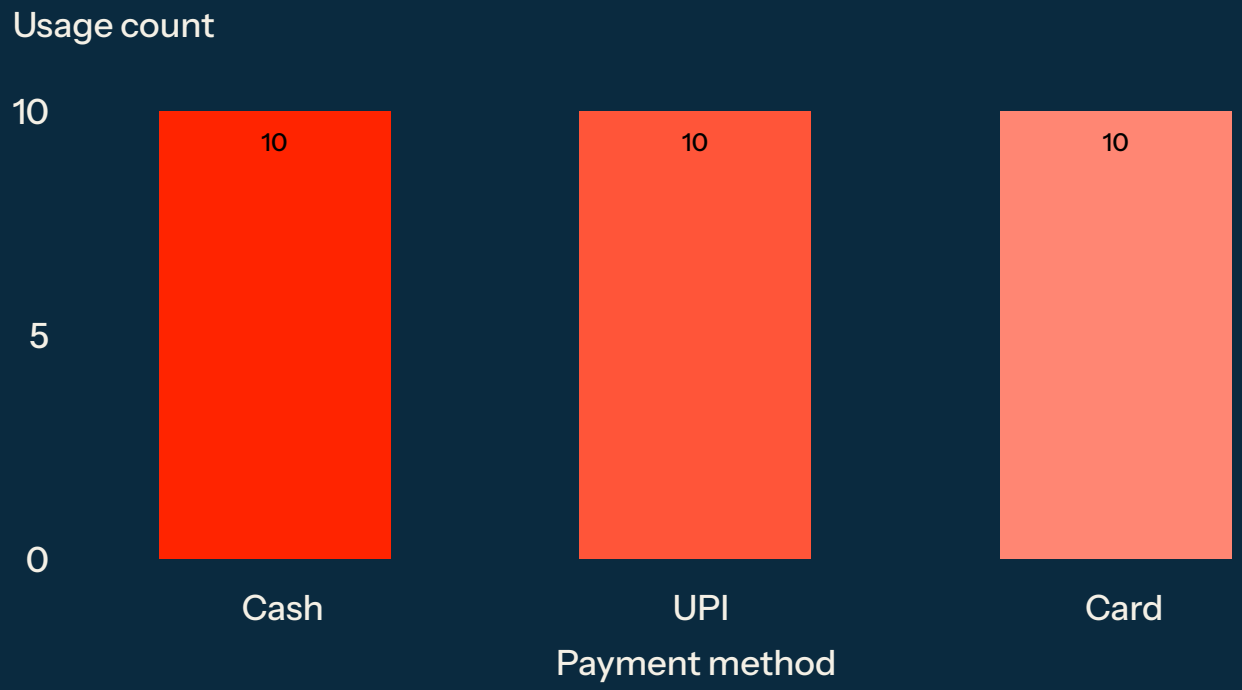

Pair the metric with product demand to test which offers can lift basket size without slowing checkout.

Use average order value as a decision baseline, not a target in isolation.

Made with GAMMA

Checkout behavior is balanced, so convenience is the opportunity

Payment method usage count

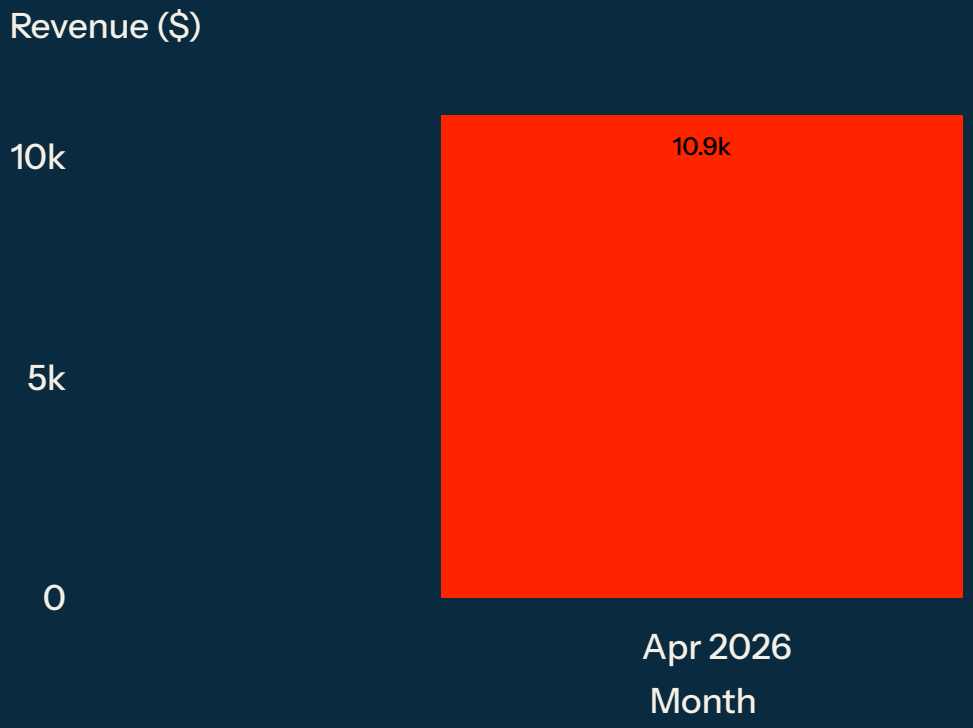

No single method dominates, which supports a flexible payment setup.

Employee ID 30 generated the highest recorded sales revenue at $600.

Made with GAMMA

April is the clearest revenue signal in the current-year view

Recorded revenue in the current-year view

April 2026 totals $10,940. Keep the monthly trend query running to distinguish a one-month spike from a repeatable pattern.

Management trigger: investigate what changed, then repeat what worked.

Made with GAMMA

WEEKLY OPERATING RHYTHM

Turn seven queries into a weekly operating rhythm

01

Review demand and stock

Fast-moving medicines and low-stock alerts.

02

Review supply risk

Supplier concentration and upcoming expiry dates.

03

Review store signals

Order value, payment mix, employee revenue, and monthly trend.

04

Close the loop

Assign one owner to each action and revisit it next week.

Made with GAMMA

THE DECISION

Better visibility turns routine database work into better store decisions

Start with the reorder list, supplier review, and monthly revenue check; then make the same questions part of the operating cadence.

The value is the habit: see the signal, assign the action, and review what changed.
